* The LightJet Print is the highest quality direct digital photographic process available today. The LightJet prints up to 48"x96" images directly to photographic paper or backlit DuraTrans materials at optical resolutions up to 406 dpi; but can produce stunning, razor sharp prints using a state-of-the-art interpolation technology derived from the satellite imaging industry. No other photographic process available today can provide prints so faithful to the original. Maximum sharpness is maintained even at high degrees of enlargement (up to 4 x 10 feet), and color fidelity and sharpness are unsurpassed.
